

**INDICATIONS:** The PLEXION® (sodium sulfacetamide 9.8%, sulfur 4.8%) product family (PLEXION® Cleanser, PLEXION® Cleansing Cloths, PLEXION® Cream, and PLEXION® Lotion) are prescription medicines that are applied to the skin to treat acne, rosacea (a skin condition with red eruptions, usually on the cheeks and nose), and seborrheic dermatitis (an inflammatory skin condition that affects the face and scalp).

## Important Safety Information

The PLEXION products are not for everyone. You should not use the PLEXION products if you are allergic to sulfonamides, sulfur, or any of the other ingredients, or if you have kidney disease.

### **KEEP ALL PLEXION PRODUCTS OUT OF THE REACH OF CHILDREN.**

Apply the PLEXION product that your physician prescribed as directed. It should not be used to treat any condition other than that for which it was prescribed. PLEXION products are to be used only by the person for which they were prescribed. Do not share them with others.

If your condition becomes worse or a rash develops in the area being treated or elsewhere, discontinue use and contact a physician. These products should also be discontinued immediately and your physician notified if you develop arthritis (pain, swelling, stiffness, and redness in the joints), fever, or sores in your mouth.

**PLEXION PRODUCTS ARE FOR EXTERNAL USE ONLY AND NOT FOR USE IN THE EYES.** Avoid contact with the eyes, nose, mouth, genital area, and anus. If the medicine gets in contact with any of these areas, rinse them immediately with a generous amount of cool water.

Before starting treatment with any of the PLEXION products, tell your doctor if you have any medical conditions, especially if any of the following apply to you: if you have allergies to medicines, foods or other substances, if you have kidney disease, if you are pregnant, planning to become pregnant, or if you are breastfeeding. It is not known if PLEXION will harm your unborn baby or if it passes into your breast milk. Also tell your doctor about any prescription, over-the-counter, or herbal medications you may be taking.

Use of any of the PLEXION products to treat acne can cause reddening and flaking of the skin. PLEXION products can cause serious blood disorders, fever, skin reactions, lupus (an autoimmune disease), and liver problems. Seek medical attention right away if any of these severe side effects occur: severe allergic reactions (rash; hives; itching; difficulty breathing; tightness in the chest; swelling of the mouth, face, lips, or tongue); redness; severe or persistent irritation.

This is not a complete list of all side effects that may occur. If you have questions about side effects, contact your healthcare provider.

To report negative side effects, contact Mission Pharmacal Company at 1-800-298-1087 or the FDA at 1-800-FDA-1088 or [www.fda.gov/medwatch](http://www.fda.gov/medwatch).
